

DIGITAL OPERATIONS PLATFORM

TAKING ENTERPRISE PROCESS AUTOMATION TO THE NEXT LEVEL WITH A REAL-TIME ADAPTIVE PLATFORM FOR COMPLEX OPERATIONS

AUTOLOGYX® FABRICAUTOMATION®

autologyx® FabricAutomation® platform enables enterprise businesses to automate complex mission-critical processes faster and more cost effectively than existing automation software. autologyx® also provides a real world solution for the practical application of Artificial Intelligence (AI) and Machine Learning (ML) and solves many business automation challenges that to date may have not been viable.

Buy Tactically. Innovate Strategically. The autologyx® platform benefits from unlimited scalability and provides the foundation for transformative solutions across your business operations.

A POWERFUL PLATFORM FOR COMPLEX AND DIGITAL OPERATIONS

The autologyx® FabricAutomation® Platform allows you to bring data, people, systems and processes together in one bespoke, agile eco-system. No compromises.

autologyx® provides the following capabilities on a SaaS platform:

UNIQUE PLATFORM FEATURES

Data-driven

Create data objects related to business concepts and activities to create a digital operations fabric across your business and enable agile, adaptive and intelligent processes.

Real time event-engine

Analyse huge amounts of real-world data and react in real-time to live events.

Task & Workflow Management

Dynamic task and case management based on data-driven decisions. Identify efficiencies and transform your processes and business operations by building better workflows.

Integration & Collaboration

Connect to virtually any business system, including ML & AI, to drive connected & intelligent processes. Improve communication and collaboration among internal and external team members.

SLA Management & Reporting

Real time reporting at a granular level. Track, evaluate and improve team, department, project or case performance. Build reports driven by data using logic and ML to deliver value.

Compliance & Auditing

Ensure 100% compliance with dynamic regulations, policies and procedures using automated client/department playbooks.

SECURITY AND TRUST

The design of autologyx® security and trust architecture recognises the mission critical nature of what we provide to our customers.

Built around a fully distributed, scalable architecture and independently audited, autologyx® works intimately with some of the world's best-in-class infrastructure and security vendors to deliver true enterprise grade security and assurance. Operating a multi-layered approach to service provision and data protection the autologyx® process automation platform is built around a true multi-tenant, multi-zone, N+1 redundant architecture with a 99.999% network uptime SLA.
