

DIGITAL OPERATIONS PLATFORM

TAKING ENTERPRISE PROCESS AUTOMATION TO THE NEXT LEVEL WITH A REAL-TIME ADAPTIVE PLATFORM FOR COMPLEX OPERATIONS

autologyx® Digital Operations platform enables enterprise businesses to automate complex processes faster and more cost effectively than existing automation software. autologyx® also provides a real world solution for the practical application of Artificial Intelligence (AI) and Machine Learning (ML) and solves many business automation challenges that to date may have not been viable.

The autologyx® platform benefits from unlimited scalability and provides the foundation for transformative solutions across your business operations.

ONE PLATFORM. UNLIMITED SCALABILITY.

Strategic

Innovate fast with new products and services

Realise digital transformation objectives

Develop your competitive edge with ML capability

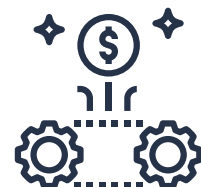

Operations

Streamline processes for operational efficiency

Track compliance activities

Scale automation across your business operations

Management

Enhance profitability and reduce costs

Achieve ROI with rapid time to value

Gain insight through business intelligence

A powerful platform for complex digital operations

autologyx® is a digital platform for the automation of business processes and provides the following capabilities on a no-code, containerised SaaS platform:

UNIQUE PLATFORM FEATURES

	Data-driven	Data and event driven architecture captures every action and change in data state. Enables the automation of processes which are routine or complex, linear or non-linear.
	Real time event-engine	Always-on automation platform reacts in real time to live events.
	Task & Workflow Management	No-code automation platform enables simple creation of complex workflows and decision trees using a drag-and-drop interface allowing the business to take control. Incorporate any 3rd party technology or data source including ML to enhance workflows.
	Integration & Collaboration	Easily connect to virtually any business system, including ML and AI, to drive connected and intelligent processes. Improve communication and collaboration among internal and external team members using a single platform.
	SLA Management & Reporting	Real time reporting at a granular level. Track, evaluate and improve team, department, project or case performance and service real-time SLAs.
	Compliance & Auditing	Create a single source of truth for your data across the business and ensure 100% compliance with dynamic regulations, policies and procedures using automated client/department playbook.
	Document Automation	Automatically generate documents and collate into document packs.

SECURITY & TRUST

The design of autologyx® security and trust architecture recognises the mission critical nature of the service we deliver.

Built around a fully distributed, scalable architecture and independently audited, autologyx® works intimately with some of the world's best-in-class infrastructure and security vendors to deliver true enterprise grade security and assurance. Operating a multi-layered approach to service provision and data protection the autologyx® process automation platform is built around a true multi-tenant, multi-zone, N+1 redundant architecture with a 99.999% network uptime SLA.
